

Chorlton High School

City Build | *Manchester*

Working closely with Cartwright and Gross architects and the client, TBS Fabrications were selected to supply & install 69no wc cubicles and 110no IPS panels to the wc areas at Chorlton High School, a 1490 place high school based in Manchester.

The brief was to supply a robust, full height unisex cubicle for open plan wc areas, to reduce anti social behaviour in the toilet areas. The result is a modern, fresh and bright wc area which pupils feel comfortable in.

Modern, Fresh and Bright for pupils in busy school

TBS full height Genesis range was selected. The solid grade laminate doors, pilasters and divisions ensure the panels are of the highest robustness available, impervious to water, durable and hygienic, the ideal choice for a busy secondary school environment.

Cubicle divisions were fixed at the ceiling and floor in U channels to create total privacy and reduce the risk of camera phones being used in the cubicles.

TBS Genesis cubicles are available in various heights with differing floor clearances to suit the client needs in terms of privacy. Floor options include a 150mm / 100mm / 50mm leg or fixing the division to the floor for ultimate privacy.

The impressive factor on this project was the fast turnaround undertaken by TBS in what is the industry's busiest period. TBS working drawings were approved on 3rd August and TBS installers were on site on 15th August, a manufacture period of 1 and half weeks.

Gary Jackson, Production Director commented "due to our increase production capacity on solid grade laminate, with having 2 saws and 2 CNC machines, working on 2 shift patterns, we can manufacture solid grade material on quicker than normal industry lead times, even on large projects such as Chorlton High in the busy summer periods".

4 different vibrant door colours Polyrey P092 Pomme Verte / Y022 Rose Bougainvillee / B001 Bleu Flash and G031 Genet were selected from the Polyrey Washroom Collection, with matching Zenith CGL panels to conceal the cisterns. To compliment the bright door colours Polyrey G003 Gris Perle was selected for a contrast colour on the pilaster and division.
