

Grosvenor G Casino

Kier North East | *Stockton on Tees*

Grosvenor G Casino in Stockton-on-Tees is now open for business, becoming the latest addition to the chain of Grosvenor Casinos across the country. The multi-million pound development was undertaken by Kier North East and is a state-of-the-art, purpose-built casino located riverside at Chandler's Wharf, Stockton.

The casino's new front-of-house washroom areas were transformed by TBS Fabrications who installed their InVerse toilet cubicles and seamless granite vanity tops; a winning combination to ensure a stylish and contemporary washroom design.

TBS Fabrications Martens Road, Northbank Industrial Park, Irlam, Manchester M44 5AX

TBS are 'Hot' in the 'House' at Chandlers Wharf

The InVerse washroom range offers an innovative and versatile cubicle system available in a wide selection of panel finishes, and features unique aluminium pilasters with customisable laminate inserts; providing the flexibility to meet individual design requirements.

Cubicles and duct panels were specified in bespoke digital print laminates to ensure a truly unique washroom design for the casino, and TBS worked in close conjunction with Formica® using their Formica Younique service to meet the design brief.

A striking black and white Spitfire from the original Haynes technical drawing was chosen for the urinal ducting, whilst a 19th century English bobbin lace was chosen to create a stunning cubicle frontage in the female washrooms. Both digital graphics were selected from the vast image library supplied by Surface View® and transferred exclusively onto Formica® High Pressure Laminate.

Greg Wilson Sales Director added "The G Casino project gave us the perfect opportunity to showcase what we can offer our clients that is slightly different to a standard washroom. The whole team enjoyed bringing this project together to a successful conclusion, in terms of programme and quality."

Formica® Younique can be specified in conjunction with any of TBS' washroom products, providing architects and designers with the flexibility to create a truly unique design. For more details see Formica Younique website
