

MTV Headquarters

Quad Contracts | *Camden London*

TBS' Flush cubicle range was selected for the refurbishment of the MTV headquarters based in Camden, London, where the installation of full-height Flush wc cubicles, matching duct panels and solid surface wash troughs have resulted in stunning washroom areas.

The Flush washroom cubicle range features a seamless cubicle façade and provides a premium quality High Pressure Laminate (HPL) cubicle system which is perfect for specifiers looking to source a completely flush design for prestigious washroom projects.

TBS Fabrications Martens Road, Northbank Industrial Park, Irlam, Manchester M44 5AX

Extremely helpful, proactive and efficient

Co-ordinating Flush wc cubicles and HPL duct panels were manufactured using Formica Younique for a truly unique washroom design. Formica Younique laminate service offers digital and screen printing solutions to allow the incorporation of virtually any design, photograph or corporate logo onto High Pressure and Compact Grade Laminate.

Two striking digital print designs were selected from the vast collection of images available from Surface View®; Bamboo II for the male and Flowerheads for the female washrooms.

Details of Formica Younique service can be found by clicking on the link below.
