

Park Brow

Morgan Sindall | Kirby

A colourful and contemporary new school, built by Morgan Sindall, provides a state-of-the-art educational environment for pupils of the former Park Brow and Cherryfield primary schools in Kirby.

With its brightly-coloured exterior and modern, open learning spaces, the new Park Brow Primary School is one the community can be proud of and TBS Fabrications were thrilled to be involved in the £6.1 million project; manufacturing and installing stylish new washrooms throughout.

TBS Fabrications Martens Road, Northbank Industrial Park, Irlam, Manchester M44 5AX

One the community can be proud of

Park Brow's infant washrooms were fitted-out with low-level vanity units and cubicles from TBS' Tots 2 Teens range for children; the perfect specification for nursery and primary school projects. Featuring shaped doors and partitions, Tots 2 Teens cubicles guarantee to meet the safety and supervision requirements needed for young children, and the vibrant orange colour scheme chosen for Park Brow results in a creative and inviting washroom environment that the younger children will be happy to use.

Floor-to-ceiling Spectra cubicles were installed within the unisex washroom areas in order to ensure maximum levels of privacy for the school's junior pupils. Featuring special height doors and over panels with floor-to-ceiling pilasters and partitions, bespoke Spectra cubicles with co-ordinating duct panelling and vanity units proved the perfect specification.

Manufactured from a high pressure laminate (HPL) finish with a durable 2mm thick PVC edging, Spectra cubicles guarantee a stylish, practical and robust washroom solution for educational applications.

TBS also installed solid surface wash troughs for Park Brow Primary School, combining contemporary solid surface troughs with HPL under panels. Available in a wide range of colours, solid surface wash troughs offer a stylish, easily-maintained, and more aesthetically pleasing alternative to stainless steel troughs or traditional wash basins, and are tailor-made to suit site dimensions or individual requirements.
