

Stepping Hill Hospital

NPS | *Stockport*

Stepping Hill Hospital, Stockport has witnessed the completion of a major refurbishment to its Intensive Care Unit; resulting in the provision of a modern, newly equipped care facility for critically ill patients.

Meeting increasing demand within the healthcare sector for durable and sterile ducting solutions, TBS' Zenith solid grade range (SGL) of duct panels provides the ideal specification for both refurbishment projects and new-build hospital developments.

Meeting increasing demand within the healthcare sector

Combining a steel framing system with compact grade laminate panels and flashgaps, TBS' Zenith SGL range proved the perfect choice for the installation of WHB duct panelling in the new seven-bed ICU at Stepping Hill; ensuring a robust system offering maximum levels of resistance to wear and tear.

All panel components were manufactured using Polyrey's Sanitized[®] Compact Grade Laminate, which features the specially-formulated Sanitized[®] additive to ensure continuous protection against the development and proliferation of bacteria.

Each Zenith duct panel, included for a hinged and lockable top panel, for ease of access to the services, thus eliminating the need for the maintenance team to remove the top panel.

Peter Fox, Head of Projects for NPS Stockport commented:

"During the design process of the Intensive Care Unit, we found TBS extremely helpful and proactive in preparing solutions to meet the clients brief. This was quickly followed up with full design details. Due to the urgency in getting the ICU back in operation, the client requested an incredibly tight programme on site. TBS were able to respond fully to this ensuring manufacture and delivery of the panels were actioned on time. The finished product was very good providing the client easy access to the services behind. Overall the performance of TBS has been exceptional and has been well received by the end users"

Supplied fully assembled and pre-hung, TBS' Zenith duct panel products are compatible with all sanitaryware variations, and are tailor-made to fit site dimensions; ensuring a truly bespoke and fit-for-purpose ducting solution.
